

# Ahmad K. Al-Madi

Amman, Jo | 0790191440 | [ahmadalamdi2005@gmail.com](mailto:ahmadalamdi2005@gmail.com) | [linkedin.com/in/aalmadi/](https://www.linkedin.com/in/aalmadi/)

## OBJECTIVE

Business Information Technology enthusiast , Full-stack Web Developer with 1 years of experience building dynamic, responsive websites using HTML5, CSS3, Tailwind CSS, JavaScript, PHP, and Node .js. Proven track record of translating UI/UX designs into clean code and integrating back-end services for fast, secure applications. Seeking a role where I can streamline development workflows and enhance user experience.

## EDUCATION

Bachelor of Business Information Technology 2023 – Present  
University of Jordan, Amman

## SKILLS

- Front-End Development
- Problem-Solving
- Database Management
- Time Management
- Back-End Development
- Microsoft Office
- Communication
- Continuous Learning

## WORK EXPERIENCE

Software Developer 2023 – 2024  
42Amman, Abdoun

- Ability to adjust to new challenges and environments swiftly.
- SQL Database Management: Designed and implemented database schemas for 8+ projects.
- Commitment to advancing digital skills among diverse populations.
- Familiarity with peer-to-peer, project-based learning approaches.
- Experience in leading teams to achieve common goals.

Web Developer 2024 – 2025  
ARTL STUDIO,Khalda

- Built dynamic, mobile-responsive websites for local clients.
- Connected projects to MySQL databases, enabling real-time content updates.
- Created custom admin dashboards that let non-technical staff manage products, blogs, and media.
- Integrated third-party REST APIs (email) to extend site functionality without bloating codebase.
- Collaborated with UI/UX designers in Figma, turning wireframes into accessible components.

## CERTIFICATIONS

---

**42Amman:** Integrated Software and Hardware Development: Acquired a strong understanding of the interplay between software and hardware in embedded systems through a challenging, project-based learning experience focused on real-world applications, encompassing over 5000 lines of code written in languages like C and C++.

Issued July – 2024.

**ARTL STUDIO:** Dynamic Web Development & Database Integration — Built mobile-responsive, data-driven websites for real clients in an Agile, project-based setting; authored 6 000 + lines of HTML5, Tailwind CSS, JavaScript, PHP, and SQL, implemented secure authentication and custom MySQL schemas, and deployed optimised solutions that cut page-load times by ~35 %.

Issued July – 2025.
